# The Story of Highton Registers and

# Why it Pays to Buy Them

EVENTY-ONE years ago, in the city of Providence, William Highton built the first Highton Warm Air Register.

In those early days, with very little experience to draw from, it was no simple task to build registers that would fit in with the builders' plans.

Today, however, the Highton Register is considered as an important part of any building plan, consequently, they have become more adapted to normal needs, and fit in with architects' designs.

From the time of the first Highton Register, they have been continuously on the market. And the sale has been constantly increasing as their quality became known.

Constant improvement, made possible only by contact with an unlimited range of heating conditions, have been typical of the Highton Line.

Today, our product is unsurpassed.

The latest addition is our New Semi-Steel Register, shown on page 9. It has an unusually strong and well constructed body, as it is electrically welded. Without any question, this is the finest Register you can buy — and it is made in all sizes.

You will notice in the back of the Catalog that we are showing some special designs in Grille and Memorial Tablets. These were produced in our new, completely equipped modeling department. This is one of the latest additions to our production department, so that, true to our past record, we can give our customers the service they ask for.

We have always taken pride in the service we have given, and we assure you that with our present up-to-date plant and trained personnel we can do even better in the future. That's our reason why it will pay you to specify the Highton

Line.

Of course, one of the essentials of service is quality. But it is hardly necessary for us to prove our quality when we have been growing for

seventy-one years.

We have always made honest registers, wellconstructed and finished. In fact, our cast bronze and iron grilles are being used more and more each year, in the finest buildings in the country, because the Highton-made grille or register has the confidence of the leading architects and engineers.

"As made by Wm. Highton & Sons Co. or equal" now appears in most architects' specifications. When a thing has become standard you can't do much better than use it. That's another reason why it pays to specify Highton.

Our prices are reasonable—no more than others for equal quality. List prices on following pages are fair standard prices, subject to discount sheets issued from time to time. On all goods not covered by list and discount, we will be pleased to furnish prices upon application. Of course, owing to the nature of our business, prices are subject to change without notice; and all agreements have to be contingent upon accidents, strikes, or delays beyond our control.

Our terms are the usual 30 days net, 2\% ten days, unless otherwise stated. Freight allowances

are made according to discount sheet.

Our factory is situated at one of the best railroad centers in New England, six lines to all points passing through this center, insuring maximum speed of shipment to all points.

The following table will tend to show the unsurpassed shipments that can be made to principal cities from our factory. Time shown below is from loading at factory to arrival at destination.

Boston . . . . . . . . . one day New York.....two days Philadelphia.....three to four days Baltimore.....four to five days Cleveland . . . . . . four days Detroit . . . . . . . . . three days

The above cover freight shipments only. Firstclass express service is obtainable at this point

In the planning of any building it is always well to consider ventilation.

Warm air registers and grilles have long been associated with the warm air method of heating, and today serve many other purposes also.

Grilles are very essential in the method of vapor heating, also as radiator enclosures, and for cold

Registers are used extensively in the method of ventilation, being placed in the supply ducts because they may be opened or closed as the case may require.

# The Mellon National Bank Pittsburgh, Pa.

THIS most excellent piece of architecture is fitted with Highton Grilles and Registers, which were selected for their harmonious design, durable construction, and maximum air capacity. Any modern building that wants the utmost in ventilation will have Highton Registers. Architect, Throwbridge & Livingston. Contractor, Baker, Smith & Co. Today the best designers and builders are specifying Highton equipment.

# Irving National Bank

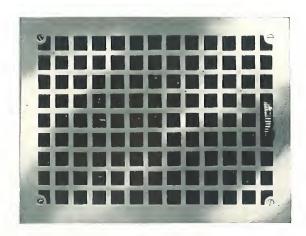

Woolworth Building New York

THE modern bank has to be attractive and comfortable. Radiation must be scientific and the installation such that the control of temperature will be most flexible. Registers and

other fittings must harmonize with the structural design. It is noteworthy that a modern bank like the Irving National of New York specified Highton equipment.

# The Highton All Cast Register

Plain Lattice Design

A Vertical Wheel Movement Register
Nothing Better Made
Cast Iron Throughout

For Prices, Sizes, and Finishes, see Pages 16 to 21

# The New Highton Semi-Steel Register

Style 200

THE Aristocrat of Registers, this new Semi-Steel Register, is radically different from any semi-steel register now being sold.

It embodies all the latest achievements in register making, and displaces the impractical slide center

movement with the Old Reliable Vertical Wheel.

The Body is so constructed that it can be made with the vales running either the long way or short way; for example, an 8 x 10 can be furnished in a 10 x 8, if so ordered.

This is a great advantage when the register is placed in the wall, because the register may be placed with the long dimensions either vertical or horizontal.

The Body is made of heavy gauge steel, with all working parts of new design, perfected after long, exhaustive

Maximum Strength Maximum Air Space

The Best Register made

tests. All parts are electric welded together, and solid steel journals are used.

The Face is made of cast iron, which insures greater strength and variety of design, as this new Highton Semi-Steel Register can be made in any design and in Cast Iron, Brass or Bronze.

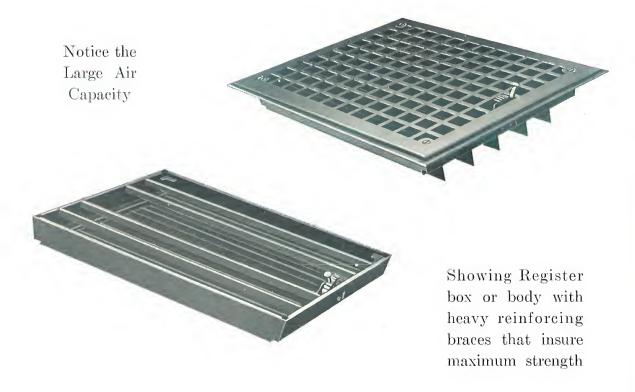

The extra long journals and heavy crowned connecting rod insure rigidity and protection from any parts falling into the Ducts.

Made in all sizes in plain lattice pattern.

INDIAN LATTICE DESIGN—EXCELSIOR DESIGN—HIGHTONE PATTERN and MALTESE PATTERN, while more expensive to make than PLAIN LATTICE, can be furnished in SEMI-STEEL at reasonable prices in the sizes listed with each cut.

# The Highton Concealed Warm Air Register Border

Patented October 18, 1921

THIS "HIGHTON" Concealed Register Border meets a long-felt want.

Saves labor in putting down finished floors, as the finished floor boards can be cut to proper lengths after border has been placed and fastened to the rough floor. Top surface or edge of border will be flush with top of the standard upper flooring or with tile, cement or mosaic floors,

also with the plaster when used in the wall.

No wide unsightly flanges like the oldstyle borders to be damaged or broken. Can be installed long before the building is ready for finishing and will not show any damage on account of the very small edges. Made in Cast Iron, Brass or Bronze Metal, and in any finish. Made to fit standard size Registers.

# Ventilators and Registers

HIS cut shows a Side Wall Ventilator (a Register with Ventilator Attachments adjusted) with cord and indicating handles.

For use when Ventilators are used in openings in wall beyond reach of the hand.

Side Wall or Ceiling attachments can be adjusted to any design of Register to make a Side Wall or Ceiling Ventilator, to be operated by cord or chain,

In ordering, it should be stated whether Ventilator is for side wall or ceiling.

For List Prices of Ventilators add 50 cents list to Register list on sizes up to  $14 \times 14$  and \$1.00 list on  $14 \times 14$  and all sizes above.

If for use in Floor it should so be stated in ordering, when strengthening bars will be added.

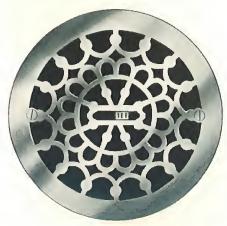

We make a specialty of registers finished in any desired color to match hardware, woodwork, or decoration.

For Designs and list of sizes made in each, see pages 8 to 12.

# Round Registers, Faces, Borders

Round Register With Floor Border

Hub Pattern

Round Register with Square Face

#### Slide-Center Movement

Cut below shows ceiling ventilator made by attaching fixtures to round plain lattice design register.

Side wall or ceiling fixtures can be attached to any design of round register.

For list price of ventilator add 50 cents list to register list on sizes up to 14 inches, and \$1.00 list on 14-inch and all sizes above.

For prices on indicators, cord, etc., see page 14.

# Lock Registers

Key Operating Type

Plain Lattice Design

LOCK REGISTERS are made in two types, the Key Operating and the Vertical Wheel Movement with our patent locking device.

The "Key Operating" Type Lock Register operates and locks by the use of a key only.

It is made in two designs, the Plain Lattice and Moorish (Asylum) Designs.

The Plain Lattice Design is intended for use where a large flow of air is required with a key operating movement.

The Moorish Design for asylums and prisons, where a close fretwork is required with a key operating movement.

Plain Lattice Design Key Operating Type Registers

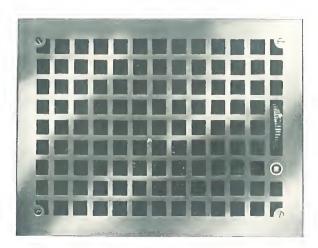

Both the ALL CAST and SEMI-STEEL are now furnished in all sizes
from 6" x 8" up to 38" x 42".

# Lock Registers

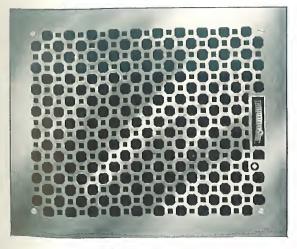

Vertical Wheel Movement with Patent Locking Device

Plain Lattice Design (Made in All Listed Sizes)

7HEN valves are in position desired turn down the screw with the key. This device for locking the valves in a Register or Ventilator in either an open, half-open, or closed position prevents

meddlesome or irresponsible from tampering with the movement. It

Moorish Design

is especially adapted for use in public buildings, asylums, prisons, or other locations where it is desired to have the valves remain in the position in which they are placed. The locking device will not interfere in any manner with the operation of the valves if it is desired to use the Register in the usual manner, as the movement of the Register is entirely separate and independent of the locking screw, which when turned up away from the connecting rod leaves the movement to be operated in the usual manner.

#### Moorish Design

(Made in Sizes Below)

8× 8	10×18	$16 \times 20$
8×10	$12\times12$	$18\times24$
$8\times12$	$12\times15$	$20 \times 20$

#### Reverse Beveled Wall Frames

A very convenient fixture for holding the Register in the wall; the frame is securely masoned into the wall and the Register is attached by screws. The Register can be removed without disturbing the wall. Adapted for use in asylums, prisons, etc. Made 2 inches and 4 inches deep.

Large size wall frames furnished in sections ready to be bolted together. This prevents breakage in shipment. Above prices cover these frames in that condition.

#### U. C. S. S. Frames

The most improved method of securing Grilles or Register faces to sheet metal ducts. The frames fit inside the duct same as Register bodies and are attached in a similar manner.

# Sanitary Registers and Grilles

for Hospitals, etc.

 $18 \times 10$ 

 $10 \times 18$ 

The above cuts show Sanitary Grilles as they appear when set in wall in horizontal and vertical positions

THE advanced sanitary conditions now required in all hospital buildings are fully met in this production, and the results of our having placed these Grilles in several hospitals and infirmaries have been the hearty approval of physicians, surgeons, and architects, and a growing demand for these Grilles in hospital work.

They are so constructed that there are no places for dust, lint, or germs to collect, all parts being of a rounded nature and easily cleaned. A study of the illustrations will show where the objectionable features of the ordinary register for this class of work have been overcome.

When ordering Hospital Registers or Grilles, the horizontal dimension should be given first.

Note in illustrations that if the Register or Grille is to be placed in a vertical position, 10 x 18 inches should be given as the required size, and if a Register or Grille of the same size is to be placed in a horizontal position, 18 x 10 inches would be the correct size to order.

Special Type Sanitary Grille

# Side Slide Wall Registers

#### For Use in Baseboards

#### Equipped with Keystone Movement

For Shallow Flues and Thin Partitions

THIS Register can be attached to the tin box or stackhead by means of straps, for which slot holes have been provided in the body frame. The face is convex type, open lattice, and adapted for any finish.

#### When Ordering Please Give Us the Following Information

1 If dimensions are opening or overall? If opening size is given we will assume that margins are approximately one inch greater all around.

By opening size we mean the rib opening; that is, dimension "A" as shown at top of page. Dimension "B" means the overall measurement.

What design is required? If Plain Lattice, advise us what mesh is to be required.

If no mesh is given on orders for Plain Lattice we will assume that our standard mesh, which is about  $\frac{3}{4}$  inch with  $\frac{1}{4}$ -inch bars, will be suitable.

3 What material is required? Steel, Iron or Bronze? If no material is specified we will assume that Cast Iron is suitable.

4 Finish desired? We can furnish most any finish desired in Enamel or Electroplated. On orders for Cast Iron and Steel, unless the

finish is given, we will assume that a Priming Coat finish is desired.

On orders for Cast Bronze material, unless instructed otherwise, we will finish them in Bright Bronze.

5 If to be drilled and countersunk, kindly give us the location of holes and size of screw. When holes are ordered we furnish a sufficient amount of 1-inch No. 10 wood screws.

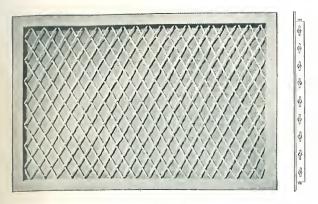

Unless drilling is specified we do not drill them.

6 If to be supplied with Hand Hole Doors, specify the location of doors and size.

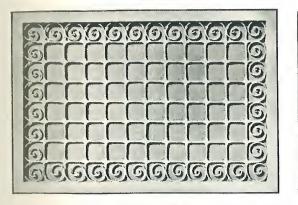

If size is not given we will make them approximately  $6'' \times 6''$ .

Hand Hole Doors are placed in all designs at additional cost.

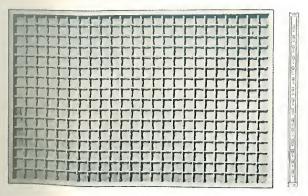

7 If to be equipped with Angle Frames, kindly submit a small sketch showing size of frame and method of attaching Grille to same.

No. 1 Diamond Mesh Grille in Angle Frame, Round Wire. This style Grille measured by opening size into which Grille sets. Furnished in any size, mesh, and wire, all finishes.

No. 2 Single Twist Flat Wire Grille with ends of wire scrolled, Angle Frame. Give size of flat wire and size of square mesh. Furnished in any size and finish. Give opening size into which Grille sets.

No. 3 Square Mesh Grille in Channel Frame. Give over-all dimensions. Grilles in Channel Frames furnished in all sizes of Square and Diamond Meshes. Also in Flat Wire Meshes. Further information and prices upon application.

### Wire Grilles

WIRE Grilles afford a cheap covering for Ventilator Openings, and are made in several styles of frames and designs, a few of which we illustrate herewith.

When ordering Wire Grilles or requesting prices please give us the following information:

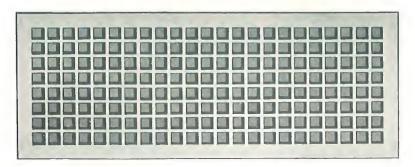

Style and size of Mesh; Gauge of Wire and whether round or flat; Style of Frame;

Size of Grille; Finish, Black, Bronzed, Plated, etc.

No standard list. Prices quoted from specifications.

### Cast Grilles

Cast in Iron, Brass or Bronze. All Finishes

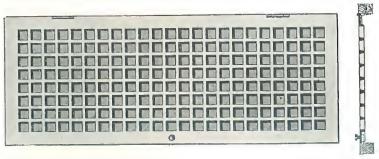

Plain Lattice Grilles are made in almost all sizes up to 18" x 80" and 40" x 80" in one section, and in all finishes.

Unless otherwise specified, a mesh approximately  $\frac{3}{4}$ " square with intervening bars  $\frac{1}{4}$ " wide will be furnished. *Prices for Grilles given* application

Plain Lattice Grilles furnished in ½" square or diagonal meshes, and in larger meshes as required. Prices on application.

All Grille Patterns are for wall use, and a heavier Grille is required for the floor, so when ordering specify whether for WALL or FLOOR USE. Also whether the Grilles are to be drilled for screws or not drilled.

Grille hinged to woodwork and with Catch for access to Valves and for cleaning purposes.

Special designs may be similarly arranged.

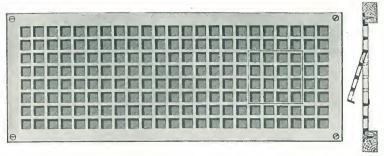

Grille hinged to Angle Frame and with Catch for access to Valves and for cleaning purposes.

Special designs may be similarly arranged.

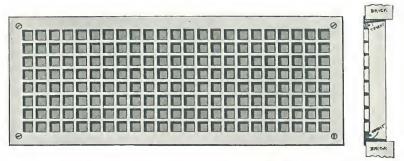

### Cast Grilles

Cast in Iron, Brass or Bronze. All Finishes

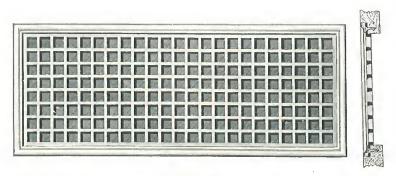

Grille with secret door in fretwork for access to valves; the secret door may be placed in any location desired.

Doors generally furnished 6 inch by 6 inch, but can be made any size required that will conform to the bars of Grille evenly. Secret doors may be placed in special designs also.

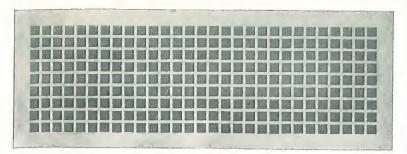

Grille attached to Cast Iron Reverse Bevel Wall Frame, either 2 inch or 4 inch deep.

For details of Wall Frames, see page 30. Special designs may be attached to Frame in the same manner.

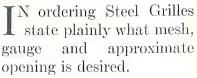

Grille held in place by wood moulding. Estimates for providing Grilles as above will be furnished upon application.

#### Steel Grilles

3/4-inch Square Mesh

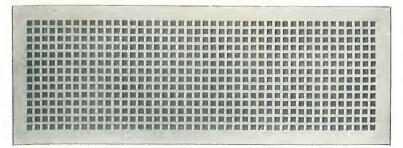

The openings in Steel will not work out to any certain size, but must conform to the number of perforations. In this case it is advisable to refer the matter of opening sizes to us.

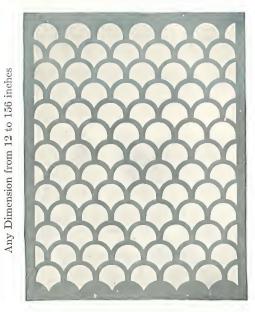

#### Wrought Bronze Grilles

Made in any size up to 50 inches wide; 120 inches long over all. Standard thickness of metal .12 gauge (.109).

½-inch Square Mesh

Any Dimension from 12 to 56 inches

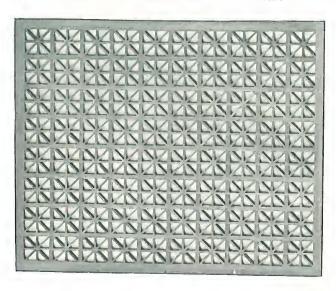

## Special Designs for Grilles

Illustration shows design No. 117, which has 62.8% openings.

Can be had in any width from 12 to 56 inches, or any length from 12 to 156 inches.

### No. 105 Design

Made in Pressed Steel or Bronze

No. 105 can be made in either 3-inch or  $3\frac{1}{2}$ -inch squares with  $\frac{5}{16}$ -inch bars between the squares. Made in any size up to 56 inches wide; 156 inches overall. Standard thickness of metal 12 ga. (.109.)

Note: The following table gives the possible openings that may be obtained in No. 105 design, and a more pleasing effect will result by the adhering to this table in determining your dimensions.

Note: It is also possible to vary the bars between the squares, any fraction of an inch from  $\frac{5}{16}$  up to  $\frac{1}{2}$  inch. Unless so specified we will make them with  $\frac{5}{16}$ -inch bars.

#### Special Designs

On the following pages we show a few only of our Special Designs. They are not carried in stock, and in most cases there is an extra charge for modeling.

We make Registers, Grilles, and Screens of designs suited to all orders of decoration, from the simple Colonial to the elaborate Renaissance. They can be made in almost any size, can be curved, concave, or convex, and shaped to fit paneling or any special shapes. We work from our own or architect's details. Cast in Brass, Bronze, or Iron. Finished in all shades and to match any standard or special finish.

#### Highton Grilles

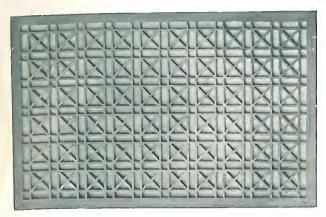

#### Foreword

The demand for Grilles has increased with that of steam and vapor heating, in the extent that they are very important in the enclosing of radiators and for exhaust air systems.

With our years of experience in this line of work we are capable of extending to our customers the latest achievements in Grille making.

We also have an extensive line of Special Designs, and can produce most any design required in Cast Iron or Cast Bronze. We are also able to furnish a limited amount of Special Designs in Steel.

In the following pages we will show some of the work we have made for our ever increasing list of satisfied customers.
